BREAK THROUGH

The theme of the Symposium 2024 is "Break Through".

Breaking through is of great importance in technology. In the past, many break-throughs have occurred that have shaped our world to the way it is right now. Think of the invention of the internet, the Turing machine, or the concept of information entropy.

Breaking through also happens on a daily basis, whether it is bypassing a type of security, solving a difficult mathematical problem or finding that one algorithm that will change the world.

We're looking for you, how do you break through the challenges within your company, what was your great breakthrough in your company and within your technology. We're awefully curious to know.

GEWIS

GEWIS is the study association for students of Computer Science and Mathematics but entails students of related studies too.

By organizing more than 35 career events each year, we try to provide sufficient career-development and career-orientation opportunities for not only members of the association but also for students of the department and even those who are interested in the topics of our department.

Are you interested in collaborating with us and improving your company's reach and potentially find your future candidate? Feel free to reach out to ceb@gewis.nl or call 040 247 2815.

100-150 STUDENTS OF MANY STUDIES

- Bachelor Computer Science & Engineering
- Bachelor Applied Mathematics
- Master Computer Science
- Master Industrial & Applied Mathematics
- Master Information Security Technology
- Master Embedded Systems

ACADEMIC CONNECTION

We're very proud to have a close connection with our department. The event will also be attended by professors, PhD candidates and EngD candidates. They will also have the time to present their academic career to the students and are welcome to join other presentations or cases too. This provides you with an opportunity to connect.

MANY OPPORTUNITIES

During our event, you will also have the opportunity to show students what you are doing at your company to break through. You can do this with a presentation, business case, speed-dates with students, or during one of many networking slots where you can talk to students at your stand or at a central point.

COMPANY STAND

1000 ;-

The event will be hosted at the Technical University of Eindhoven, in the building named "Auditorium". In this building, there is a large big entering space where you can have a stand of around 8-12m2. Here, students can come by to talk to you and about your company. This is the same space where everyone will gather for lunch and the networking market.

You will also possibly be able to engage in speed-dates with students who sign up beforehand in order to meet you and your company on a more personal, closer level and possibly invite candidates for an interview.

After the main event has passed, there will be an outside drink where you can talk to more students and share a drink or snack with them.

PROGRAM

10:00 - 10:10 Opening words

10:10 - 11:00 Opening Speaker

11:15 - 12:15 First presentation/case slot

12:15 - 13:15 Networking Lunch & Speed-dates

13:15 - 14:15 Second presentation/case slot

14:15 - 15:00 Networking Market & Speed-dates

15:00 - 16:00 Keynote Speaker

16:00 - 16:15 Closing

16:30 - 18:00 Networking borrel & snacks

OPENING SPEAKER

1500 ;-

As the opening speaker, you give a presentation or lecture for all attendants. This talk should give students technical insight about challenges or projects you have worked on or are currently working on. It's great to also create a connection with the theme of "Break Through". This way, you can captivate students with your topic.

LECTURE OR PRESENTATION

900 ;-

A lecture or presentation can be given to a delegation of participants as there will be parallel sessions for presentation/case slots. This talk should give students technical insight about challenges or projects you have worked on or are currently working on. It's great to also create a connection with the theme of "Break Through".

WORKSHOP OR BUSINESS CASE

800 ;-

A workshop or business case is given by you to a delegation of participants. This workshop should be interactive and involve students in a case you have faced previously or are facing today. During this event, it is great to link to the way you broke through this challenge or plan on defeating it in the future to connect to the theme.

Will you Break Through with us?

Feel free to contact us and discuss possibilities with us. We're very happy to meet with you.
